

SAFETY DATA SHEET ACCEDE

Revision Date: 28/10/2022
Revision Number: 01

1. PRODUCT AND COMPANY IDENTIFICATION

Identification of the product/preparation

Product Name:	ACCEDE
EPA Registration Number:	73049-517
Product Number:	VBC-0218
Product use:	Plant Growth Regulator (agricultural use)

Active Ingredient

1-aminocyclopropanecarboxylic acid	
CAS Number:	22059-21-8

Manufacturer

Company Name:	VALENT BIOSCIENCES CORPORATION
Address:	1910 Innovation Way, Suite 100 Libertyville, Illinois 60048

Supplier

Company Name:	PHILAGRO SOUTH AFRICA (PTY) LTD
Address:	1 st Floor, The Corner Office 410 Lynnwood Road LYNNWOOD RIDGE 0040
Telephone:	+27(0) 12 348 8808
Fax:	+27(0) 12 348 3500
E-mail Address	info@philagro.co.za

Emergency Telephone Numbers:

Medical information in case of poisoning

Griffon Poison Information Centre:	+27(0) 82 446 8946
Tygerberg Hospital Poison Centre:	+27(0) 86 155 5777

Relevant identified uses of the product and uses advised against

A liquid concentrate plant growth regulator for use on crops as indicated on the product label.

The product should not be used for any other purpose or in any other manner contrary to the information supplied on the product label.

2. HAZARD IDENTIFICATION

Classification of the substance or mixture

This product is classified as hazardous according to the criteria in South Africa - GHS classification and labelling of chemicals – SANS10234 and the Regulations for Hazardous Chemical Agents - 2021.

SAFETY DATA SHEET ACCEDE

Classification

HAZARD CLASS

Aquatic Toxicity - Acute

CATEGORY

2

HAZARD STATEMENT NUMBER

H401

Label Elements

South Africa. GHS classification and labelling of chemicals – SANS10234, and the Regulations for Hazardous Chemical Agents - 2021.

Pictogram/s:

None

Signal Word:

None

Hazard Statements:

H401 Toxic to aquatic life.

Precautionary Statements:

General

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P103 Read carefully and follow all instructions.

Prevention

P273 Avoid release to the environment.

Disposal

P501 Dispose of contents or container to an approved waste disposal facility and in accordance with national regulations.

Other Hazards

None

3. COMPOSITION/INFORMATION ON INGREDIENTS

Mixture

Trade Name:

ACCEDE

IUPAC/Chemical Name (active ingredient):

1-aminocyclopropanecarboxylic acid

Molecular Formula:

C₄H₇NO₂

Formulation:

Soluble Concentrate

SAFETY DATA SHEET ACCEDE

Ingredients with Hazard Concerns (GHS):

According to UN GHS criteria.

Hazardous Component	CAS Number	Weight - %	GHS Classification
1-aminocyclopropanecarboxylic acid	22059-21-8	10%	Aquatic Acute 1 – H400 (M factor = 1)
Trade Secret	Trade Secret	90%	Not classified

NOTE 1: The other ingredients not included above, do not cause or contribute towards the correct GHS classification of ACCEDE and is therefore, in terms of the South African Regulations for Hazardous Chemical Agents - 2021; Regulation 14(b), not listed.

4. FIRST AID MEASURES

Description of First-Aid Measures

General Advice In all cases of doubt, seek medical attention.

Eye Contact Remove from source of exposure. Flush with copious amounts of water. Remove contact lenses, if present and easy to do, after the first 5 minutes, then continue rinsing. If irritation persists or signs of toxicity occur, seek medical attention. Provide symptomatic /supportive care as necessary.

Skin Contact Remove from source of exposure. Take off contaminated clothing. Flush with copious amounts of water. If irritation occurs or signs of toxicity occur, seek medical attention. Provide symptomatic/supportive care as necessary.

Inhalation Remove from source of exposure. If signs of toxicity occur, seek medical attention. Provide symptomatic/supportive care as necessary. If person is not breathing, seek medical advice, then give artificial respiration.

Ingestion Remove from source of exposure. Move person to fresh air. Do NOT induce vomiting. If signs of toxicity occur, seek medical attention. Provide symptomatic /supportive care as necessary.

Medical Advice

No specific antidote. Treat symptomatically and supportive.

Most important symptoms/effects, acute and delayed

Acute: Skin irritation, eye irritation and may cause respiratory irritation

Delayed: No information on significant adverse effects

5. FIRE FIGHTING MEASURES

Suitable (and unsuitable) extinguishing media

For small fires, use carbon dioxide, dry chemical (powder) foam or water spray. Foam and dry chemicals are recommended to minimize the environmental impact. Do not use high volume water jets due to potential contamination.

If water is used for firefighting, dike and collect water to prevent run-off from the site.

Specific hazards arising from the chemical

Combustion and/or pyrolysis of the product in case of fire generates irritating, toxic and corrosive fumes (or gasses) (Carbon oxides, nitrogen oxides, calcium oxides, hydrogen chloride gas). Harmful substances in the water runoff from fire control may have adverse environmental and biological effects.

Special protective equipment and

Firefighters must wear emergency equipment including positive pressure self-contained breathing apparatus with a full-face mask. Remove unaffected containers from fire area if

SAFETY DATA SHEET ACCEDE

precautions for fire-fighters

possible. Keep fire exposed containers cool by spraying with water. Evacuate the area and fight the fire upwind and from a safe distance to avoid exposure to hazardous combustion products and the inhalation of hazardous vapours and fumes from burning material. Avoid pollution of waterways by run-off from the site. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local and national regulations.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment, and emergency procedures

Do not breathe in vapours/mist/fumes and avoid contact with eyes, skin and clothes. Ventilate the area of the spill, especially when in confined areas. Do not touch or walk through spilled material. Contain spills if it can be done without risk. Wear appropriate protective clothing recommended in Section 8 of the SDS.

Environmental precautions

Prevent further spillage if safe to do so. Do not allow the spilt product to enter water courses and drains and avoid contact with soil. Do not allow the spilt product to spread to other areas - keep the spilt material contained and isolated. Report spills and releases as required to appropriate authorities if the spilt product has caused environmental pollution (sewers, water ways, soil, or air).

Methods for cleaning up

In case of spill (liquid) soak it up immediately with suitable absorbent, such as sawdust, granular absorbent clay or vermiculite. Sweep up and place into sealable containers. Dig up heavily contaminated soil and place into drums. Use a damp cloth to clean floors and other objects, and also place in sealable container. Dispose of all waste and contaminated clothing in the same manner as waste chemicals (i.e., via an authorized disposal facility). Do not wash residues into drains or other waterways.

7. HANDLING AND STORAGE

Precautions for safe handling

Read the label before use. Use in a well-ventilated area (preferably outdoors). Prevent contact with eyes, skin, and clothing. Do not breathe in vapour/mist. Wear protective clothing and equipment during handling as described in Section 8 of the SDS. If clothing gets contaminated with the product, change to clean clothing promptly. Do not eat, drink, or smoke while handling the product. Wash hands and face thoroughly with soap and water after use. Keep containers closed when not in use. Locate emergency showers and eye-rinsing facility near the work/handling area. Maintain good normal industrial hygiene and housekeeping practices in areas where the product is used/handled.

Conditions for safe storage, including any incompatibilities

The entrance to storage facilities should be granted only to appropriately trained personnel. Always store locked up and keep containers tightly closed. Store in the original, closed container. The formulation is stable if stored well ventilated, cool, and free of moisture and high humidity. Store between 8 and 25°C, but above 12°C once opened. Keep out of reach of children, uninformed persons, and animals. Protect containers from physical damage. Check the condition of storage containers periodically. Do not store with seed, fertilisers, or foodstuffs to prevent contamination.

SAFETY DATA SHEET ACCEDE

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Occupational Exposure Limits

Occupational exposure limits have not been established for the classified ingredient in South Africa.

Appropriate engineering controls

Use with general or adequate local exhaust ventilation to maintain airborne concentrations as low as possible. Ensure adequate ventilation in confined areas. Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Personal Protective Equipment

Respiratory Protection	Use mist/vapor filtering respirator (MSHA/NIOSH approved number prefix TC-21C) or a NIOSH approved respirator with any N, P, R or HE filter).
Skin and Hand Protection	Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Wash gloves when contaminated and dispose of and replace immediately when contaminated inside, when perforated, when contamination on the outside cannot be removed or when signs of damage. Coveralls, apron, shoes, and socks are required to prevent skin contact and contamination of personal clothing. Wash thoroughly with soap and water after handling.
Eye/Face Protection	Wear goggles, safety glasses with side shields or full-face shield when splashing or spraying of materials is likely.
General Safety and Hygiene Measures	Handle the product in accordance with good industrial hygiene and safety practice. An eye wash fountain and safety showers should be available and easily accessible. Avoid contact with the skin, eyes and clothing and immediately remove all contaminated clothing. Wash the hands and/or face before breaks and at the end of the shift. Do not eat, drink, chew gum or smoke while working with product.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance/physical state	Liquid
Odour characteristics	Faint and unpleasant, sulfur odor
Colour	Golden amber
Density (g/ml)	Not determined
Solubility in water (g/100mL) @ 20°C	Not determined
Flammability	Not flammable
Flash point (°C)	No flash point observed
Flammable limits-LEL	Not determined
Vapour pressure (mPa) at 25°C	Not determined
Decomposition temperature (°C)	Not determined
Boiling point range(°C)	Not determined
Melting point (°C)	Not applicable - liquid
pH (at 20 ± °C)	5.6
Auto-ignition temperature (°C)	Not determined
Particle characteristics	Not applicable – liquid
Bulk density	Not applicable
Partition coefficient and 20°C:	Not determined
Dynamic Viscosity (cps)	Not determined
Kinematic Viscosity	Not determined

SAFETY DATA SHEET ACCEDE

Explosive properties
Oxidizing Properties

Not explosive
Not oxidizing

10. STABILITY AND REACTIVITY

Reactivity

The product is stable under normal ambient and anticipated storage and handling conditions of temperature and pressure. Could decompose at elevated temperatures.

Chemical Stability

Stable for 2 years under recommended storage and handling conditions.

Possibility of Hazardous Reactions

None known under conditions of normal use.

Conditions to Avoid

Avoid extreme temperatures (>50°C), storage without ventilation, moisture (humidity) or light.

Incompatible Materials

Incompatible with strong oxidising agents.

Hazardous Decomposition Products

Does not decompose when used for intended uses.

Decomposes on heating. Under burning conditions, this product may form toxic and irritating fumes including, carbon monoxide and unidentified organic compounds.

11. TOXOLOGICAL INFORMATION

Information on likely routes of exposure

Based on available data, no classification criteria are met for any of these hazard classes. This product is for agricultural use, therefore the most probable route of exposure are via skin or inhalation.

Information on toxicological effects

Acute toxicity:

Experimental toxicological data are available on the product.

ACCEDE has a low acute toxicity following dermal, oral or inhalation exposures.

Assessment of acute toxicity:

Product/ingredient Name	Dose Acute -	Species	Test Result
ACCEDE	>5000 mg/kg	Rat	LD ₅₀ Oral
ACCEDE	>5000mg/kg	Rat	LD ₅₀ Dermal
ACCEDE	>5.11 mg/L	Rat	LC ₅₀ Inhalation (Dust/Mist)

Skin Corrosion/Irritation:

Assessment of serious damage to skin:

Based on available data, the classification criteria are not met.

Slightly irritating.

SAFETY DATA SHEET

ACCEDE

Serious Eye Damage/Irritation:

Assessment of serious damage to eyes/eye irritation:
Based on available data, the classification criteria are not met.
Minimally irritating to the eye.

Respiratory/Skin Sensitization:

Assessment of sensitization:
Based on available data, the classification criteria are not met.
Not sensitizing.

Germ cell mutagenicity:

Assessment of mutagenicity:
Based on available data, the classification criteria are not met.

Carcinogenicity:

Assessment of carcinogenicity:
Based on available data, the classification criteria are not met.

Reproductive toxicity and Developmental toxicity:

Assessment of reproduction toxicity:
Based on available data, the classification criteria are not met.

Specific target organ toxicity (single exposure):

Based on available data, the classification criteria are not met.

Repeated dose toxicity and Specific target organ toxicity (repeated exposure):

Based on available data, the classification criteria are not met.

Aspiration hazard:

Based on available data, the classification criteria are not met.

12. ECOLOGICAL INFORMATION

Ecotoxicity

The product is toxic to aquatic organisms with potential long-lasting effects.

The product will not enter the environment under normal use if used as indicated on the label. Care should however be taken to avoid any additional release to ground water or sewage systems (even in small quantities), for example through inappropriate disposal.

No eco-toxicological data is available for the formulated product. This ecological assessment is based on data for the active ingredient.

Ingredient	Species and Genus	Exposure (hours/days)	Result in fresh water
1-aminocyclopropanecarboxylic acid TG	Crustacea (<i>Daphnia magna</i>)	48h	Acute EC ₅₀ : >105 mg/L
1-aminocyclopropanecarboxylic acid TG	Fish	96h	Acute LC ₅₀ : >117 mg/L

SAFETY DATA SHEET

ACCEDE

1-aminocyclopropanecarboxylic acid TG	Algae	72h	Acute EC ₅₀ : 0.21 mg/L
1-aminocyclopropanecarboxylic acid TG	Algae	96h	Acute EC ₅₀ : 0.28 mg/L

Environmental Effect	Description
Persistence and Degradability:	Soil: DT50 < 4 days.
Bioaccumulative Potential:	No data available.
Mobility in Soil:	No data available.
Other Adverse Effects:	No other known adverse effects on the environment.

13. DISPOSAL CONSIDERATIONS

Dispose in accordance with all local regulations. Do not contaminate water sources food, or feed by storage of the product or disposal of used containers. The product or empty containers must not be disposed of as part of general waste.

General container handling: Non-refillable container. Do not reuse for any purposes or refill the container. Triple rinse container (or equivalent) promptly after emptying.

Empty containers: Offer for recycling, if available. Recondition if appropriate or puncture and dispose of in a hazardous waste landfill, or by other procedures approved by the local authorities.

Contaminated packaging: Contaminated packaging should be emptied as far as possible and disposed of in the same manner as the product.
